TRM 12L14 Oversize Head Mag Wheel Nut Installation Guide

General Instructions:

- Lightly lubricate your studs, the shanks of the nuts, & both sides of the washers with a quality automotive chassis grease before installation.
- The nuts are made from 12L14 alloy steel and will rust if subjected to water or salt spray. They are not plated in order to preserve dimension accuracy. Occasionally apply a thin film of WD-40 to the heads of the nuts to prevent rust and corrosion.
- The washers are made from 7075 aircraft aluminum and will not rust or corrode.
- Recommended tightening torque:
 - 1/2-20 Threaded nuts – 100 ft. lbs. for street, 120 ft. lbs. for racing.
 - 7/16-20 Threaded Nuts – 80 ft. lbs.
